Hobart Electronics Compliance with REACH statement

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union Commission (EUC) Regulation on chemicals and their safe use (EC 1907/2006) entered into force on June 1, 2007 and will be phased in until 2018.

Hobart Electronics supports the basic aim of REACH in improving the protection of human health and environment through the better and earlier identification of intrinsic properties of chemical substances. Hobart Electronics meets all applicable REACH requirements and is committed to provide our customers with information about substances in its production as required.

Under REACH, registration of substances which are used for manufacturing of articles do not apply to Hobart Electronics operations.

Hobart Electronics products are “articles” as defined in REACH Article 3(3) and do not release substances under their normal use. Suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if those are present above a concentration limit of 0.1% on an article level. Hobart Electronics products do not contain any of the listed SVHC’s. Hobart Electronics will continue to work with our suppliers to ensure that all SVHC’s are notified to the European Chemicals Agency, if necessary, to comply with the REACH requirement.

Hobart Electronics assures its customers that our products are in full compliance of the EU REACH requirement. Questions regarding our REACH compliance can be addressed via the following:
